Experience

Full Stack Developer *Navi Mumbai, India*
Noun Asia *May 2026 – present*

- Partnered with business and operations stakeholders across **four B2B clients** to elicit requirements, define milestones, validate workflows, and deliver service integrations.
- **McDonald's UAE:** built a supply-chain quality platform **for UAT**, digitizing paperwork and accelerating communication across **200+ restaurants serving an estimated 62M annual guest visits**.
- **VKL Seasoning (SDLC design stage):** designed an internal case-management platform with **configurable state machines across 16 roles**, replacing scattered manual handling with **centralized case ownership, SLA tracking, RCA/CAPA, recalls, and audit-ready workflows**.
- **Ranjeet Enterprises:** built a live **construction ERP** centralizing fleet, inventory, finance, and payroll, cutting report preparation from **3 days to on demand** with transaction-level expense visibility.
- **Burgers & Booch (Launch-ready):** built a **multi-tenant direct-ordering platform** with branded storefronts and Petpooja integration, offering restaurants a **fixed-subscription alternative** to aggregator costs reaching **up to 40% of order value**.

Software Development Engineer Intern *Navi Mumbai, India*
LetsUpgrade *Aug 2025 – May 2026*

- Led a three-part video-generation system (web editor, **job orchestration**, and **programmatic renderer**) for an AI learning platform, reducing generation time from **15 minutes to 3 minutes (80%)**.
- Moved resource-heavy rendering from **trigger events to asynchronous serverless jobs**, resolving memory bottlenecks and improving **failure recovery**.
- Integrated the production service and admin editor with the LMS, **troubleshot production issues**, and completed deployment documentation and engineering handover.

Project Intern *Navi Mumbai, India*
LetsUpgrade *Dec 2024; Feb-Mar 2025*

- Built **Quick Snap**, reducing PDF-processing time from **5 minutes to 15 seconds (95%)**.
- Developed and handed over AI-assisted college-review workflows covering **22 evaluation parameters** within one week.

Skills

Languages & CS: Python, JavaScript, TypeScript; basic SQL, HTML, CSS; Data Structures, Algorithms, OOP

Frameworks & Systems: React, Next.js, Node.js, FastAPI, Django, Fastify, LiveKit, WebSockets, Remotion

Cloud & Tools: AWS (S3, DynamoDB, EC2, Lambda), RunPod Serverless, Docker, Linux, Git, CI/CD, Vercel

Data, AI & Practices: PostgreSQL, Mastra AI, Unit Testing, Code Reviews, SDLC, Distributed Systems

Projects

Open-Source Training Video Generator *Sep 2026*
TypeScript, React, Node.js, Remotion, Docker

- Built an open-source system that converts documents into structured training-video scenes through a web editor and programmatic rendering pipeline.
- Packaged the application for self-hosted deployment and documented the generation workflow from source upload to video export.

Low-Latency Voice Inference Engine (In Development) *Sep 2026 - Present*
Python, LiveKit, WebSockets, Mastra AI, RunPod Serverless

- Building a full-duplex voice pipeline with an asynchronous orchestrator and serverless GPU workers for streaming STT, LLM, and TTS stages.
- Designed filler-audio latency masking and an interruption kill switch that clears playback, cancels GPU work, and resets conversation context.

Achievements

Hyperthon India 2025: 1st Prize (**INR 25,000**) at the Mumbai Edition; National Finalist in the Bengaluru round

International ASIFA Student Research Paper Conference: Best External Paper Award

AWS Cloud Practitioner Essentials: AWS Training and Certification, Dec 2025

More achievements: Awards, talks, certificates, and proof at kadamsahil.com/proof/

Education

ITM Skills University *Navi Mumbai, India*
B.Tech in Computer Science Engineering *July 2024 – Aug 2028*

- CGPA: 9.5
